Education

BVRIT Hyderabad College of Engineering for Women
Bachelor of Technology in Computer Science
CGPA: 8.58 / 10

Hyderabad, India
Expected May 2028

Technical Skills

Programming Languages: C, Java, Python, SQL
Core Concepts: Data Structures, Algorithms, Problem Solving

Coding Profile

LeetCode and CodeChef: Solved 100+ problems across core data structures and algorithmic topics.

Experience

Summer of AI Intern — Swecha Foundation

Mar 2025 – Aug 2025

- Contributed to open-source AI projects focused on solving real-world community problems.
- Developed Python-based solutions and collaborated in team-based development environments.

Projects

AI Smart Energy Consumption Optimizer

Developed a machine learning system to predict appliance-wise energy consumption and estimate electricity costs using historical data. Implemented a Random Forest model for accurate predictions and usage pattern analysis. Built a Streamlit-based interface for user inputs and visualized results through graphs. Generated optimization suggestions to reduce energy consumption and cost.

Intelligent Route Optimization System

Built a route optimization system using graph structures and Dijkstra's algorithm to compute shortest paths. Modeled real-world maps with nodes and weighted edges, using adjacency lists for efficient and scalable performance.

Expense Tracker (Java)

Developed a console-based application for recording and categorizing personal expenses. The program allows users to track spending patterns and generates simple summaries for expense analysis.

Research

- Authored a research paper titled *“Generative AI for Biomarkers Discovery Identifies Early Signs of Disease.”*

Achievements

- Winner — Catch-It-Quick Code Debugging Contest.

Leadership

- Event Management Lead — ASPIRE AI Club.
- Student Leader — Pan IIT Alumni Leadership Series (PALS).
- Campus Ambassador — Student Tribe.
